The well will be drilled deeper. The Templeman Oil corporation is drilling at 200 feet on the Prowant farm in 2-16-4 south of Cushing.

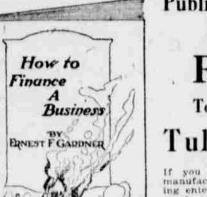

Building a Road to the Oil Fields. The Broken Arrow people and prominent oil producers are building a road from Broken Arrow to the new field recently opened by Webster and others that is usually referred to as the southwest extension to the Inoia fields. It will be a mighty good investment. Late news from the new field is to the effect that Webster and others are The Broken Arrow people, and

Amassed a Stupendous Fortune by Investing in French Government Bonds When They Were Cheap

Rothschild bought French Bonds when the streets of Paris were running with blood.

He did so against the advice of the Banking Fraternity of the Whole Civilized World of that Day.

A Distinguished London Banker said Rothschild was not only craze, but slated for bankruptcy.

Rathschild commenced buying French Bonds shortly after the outbreak of the Revolution, when they were selling at

He was still burning after eight years of revolution and foreign wars. The bonds were then selling at 7% of par-

One year after the end of the Revolution, the same bonds were selling at 44%.

Seven years later, the bonds were selling at 93%.

Thus Rothschild stood vindicated in his judgment against that of the entire world, and laid the foundation for a fortune, now estimated at between four and five billions

Similar opportunities for profitable investment in French Government Bonds obtain today, but admittedly it is not a matter of common knowledge or understanding.

If you have faith in the survival of the Great European Nations, which, through centuries of constructive effort, beginning long before the discovery of America, have made our modern civilization possible, and

If you have the courage of your convictions

You have the courage of your convictions
You can reap unusual profils by purchasing French Government 1% Bonds today, when they are cheap.

Assuming that the French 5% Loan will be redeemed on lanuary 1st, 1931, and that the normal rate of Exchange will have been restored by that time, the average annual yield of such bonds purchased at today's prices in dollars will be more than 40% or a total of 1906. will be more than 40%, or a total of 400% for the ten years, provided that the coupons are left with the bonds and not cashed except at normal Exchange rates.

We specialize in French Government Bonds and are equipped to furnish detailed information regards same.

Notice of Sale of Oil Land

Notice is hereby given that, pursuant to an order of the district court of Wagoner county, Oklahoma, in the case of Annie Chissoe vs. Nancy Coday et al, No. 4057, dated the 6th day of April, 1920, the undersigned sheriff of Wagoner county will, on the 10th day of May, 1920, at 10 o'clock a. m., at the front door of the courthouse in the city of Wagoner, Okla., and at public outcry, sell the following described real estate, to-wit:

The south half of the southeast quarter, and the northeast quarter of the southeast quarter, and the southeast quarter of the southeast quarter of the southeast quarter of the southwest quarter of section 23 and lot No. 2 of section 26, all in township 17 north, range 15 east, the same containing 160 acres, more or less, and being the allotment of Margaret Bird Childers and situated in Wagoner county, Oklahoma.

Said property has been appraised at a total value of \$16,522.50, and no bid will be considered or accepted for less than two-thirds of said amount. Said sale will be to the highest and best bidder for cash, subject to the confirmation of the district court of Wagoner county, Oklahoma, in the above entitled

> CONNY MURPHY, . Sheriff of Wagoner County, Oklahoma. By J. S. O'BRIAN, Deputy.

The sale of the above described land includes the fee-simple title and immediate possession thereof, and there is now two dwelling houses on the same, one a 10-room house and one a feur-room house and with all necessary outbuildings for farm purposes. The land is of a good quality for farming purposes. There is also an oil and gas mining lease in full force and effect thereon, which has been developed in the past year, there now being a number of good producing oil wells on the said land, and more drilling at this time, and the said land is within a well defined oil producing territory, a large well having recently been brought in in section 16, which is near this land.

The sale of the said land also includes the royalty interest in the production, which is one-eighth of the total production, and which royalty interest, or one-eighth of the total production, goes with the deed to the purchaser at said sale.

The total production of oil from said land for the month of January, 1820, the last report obtained from the Indian agency, was 1.510.53 barrels of oil, there having been an additional well brought in on this land since the date of the above report, and which makes the total production larger than reported in January.

The purchaser will buy at this sale the fee-simple title to the above described land, the immediate possession of the land and all improvements thereon, the royalty interest in all oil and gas produced therefrom, which is one-eighth of the total production of oil and the payments for the said royalty inferest will run to the purchaser from the date of the confirmation of the sale by the district court of Wagoner county, Oklahoma.

This land is worth for farming purposes, aside from the oil value, at a conservative estimate, \$8,000, and is a good buy.

Sale Set for Monday, May 10th 1920, at 10 A. M. At Wagoner, Oklahoma
